🎓 EDUCATION

B.Tech, K L University

08/2023 – present | Vaddeswaram, India

- I am a student at KL University pursuing a degree in Computer Science and Engineering (CSE).
- With a strong passion for astronomy and gaming, I aim to blend my technical skills with my interests in these fields.
- My studies cover core computer science concepts like programming, data structures, algorithms, and system design.
- As a CSE student, I am particularly interested in how technology can enhance our understanding of the universe through astronomical simulations and gaming applications as a result I am trying to bring a blend of this into reality by AR,VR and other Augmentations.

PROJECTS

Web Development

12/2023 – present

- With a strong foundation in **HTML, CSS, JavaScript, and Prompting**, I have developed a diverse range of static and dynamic websites, focusing on both functionality and user experience.
- My web development projects include **business websites, personal portfolios, blogs, and interactive applications**, each designed to be visually appealing and responsive.

Decoding SuperDense Coding,

Amravathi Quantum Valley Hackathon Project

08/2025 – 09/2025

Contributions:

- Designed the overall system architecture for a quantum computing simulator implementing the Superdense Coding Protocol.
- Planned and established a modular code structure, separating core quantum logic, configuration management, and user interface components for maintainability and scalability.
- Developed the technical framework enabling real-time quantum circuit simulation, multi-user authentication, and advanced security features.
- Collaborated with the development team to integrate Qiskit AerSimulator, Streamlit UI, and comprehensive testing.
- Ensured professional code organization and optimized imports for efficient development and future extensibility.

PROFESSIONAL EXPERIENCE

ZEROONE The Code Club

CLUB MEMBER

08/2023 – present | Vaddeswaram, India

- ZeroOne is a technical club at KL University that organizes various technical activities, As a result we do projects that maintain a part of the College technical aspect.
- As part of the club, we engage in hands-on projects, coding challenges, workshops, and events, fostering skill development and collaboration among students interested in technology.

Team Lead

04/2024 – 04/2025 | Vaddeswaram, India

- ZeroOne is a coding club at KL University, and I am an active member.
- I served as the team lead for a small group of about 6 members, where we developed a task manager website for our social internship project.
- My role centered around designing and developing a task management plugin to streamline the process of tracking, updating, and closing tasks within the team. Additionally, I was involved in designing the web plugins and other features to enhance the overall user experience.
- The project provided a hands-on opportunity to enhance our coding skills and apply them in a real-world setting. It helped us improve our problem-solving abilities, fostered collaboration, and played a significant role in the success of the project.

VIVIDRA, LEAD OF TECHNICAL DEPARTMENT

07/2024 – 11/2024 | Vaddeswaram, India

- This startup was founded at K L University and consists of 8 members, including myself.
- Our team is divided into various divisions, such as Sales, Design, and IT, each contributing to the overall success of the company.
- As the Manager of the IT department, I am responsible for overseeing all technology-related aspects, including system development, maintenance, and ensuring that our IT infrastructure is efficient and secure.
- My role also involves coordinating with other departments to align technology with the company's goals and ensure smooth and easy progress with the overall quality.

Parsing of Scan Documents Using AI-Based OCR Techniques, DLRL

05/2025 – 07/2025

- Designed the complete system architecture and developed the end-to-end OCR pipeline for scanned documents.
- Implemented integrated workflows combining traditional OCR with AI-based methods for structured data extraction.
- Developed and tested the prototype, ensuring robustness, accuracy, and scalability.
- Led testing, optimization, and deployment of the solution, delivering it successfully to the concerned department at DRDO.
- Successfully completed the internship as part of the academic requirements for the B.Tech  (Computer Science) degree.

FITOOR-E-KALA, Product Researcher

01/2025 – 05/2025 | Vaddeswaram, India

- This Startup was founded in K L University
- At FITOOR-E-KALA, my role as a **Product Researcher** isn't just about analyzing trends—it's about understanding the deeper connection between sustainability, fashion, and consumer needs.
- Every day, I dive into the world of eco-friendly products, exploring innovative materials and fabrics that are shaping the future of sustainable fashion.
- I keep a close eye on what's trending—not just what's popular, but **why** it's gaining attention.
- Why are certain fabrics in demand right now? What makes them stand out? Is it their sustainability, comfort, or cultural significance? I ask these questions and dig deep to find the answers, ensuring our products align with both industry trends and our brand's commitment to ethical fashion.
- Beyond research, I collaborate with our design and sales teams, turning insights into meaningful product choices. I look at emerging textile technologies, biodegradable materials, and ethical sourcing, always searching for ways to make sustainability the **norm** rather than the exception.
- For me, this isn't just a job—it's a mission. I believe fashion should be beautiful, responsible, and innovative. By staying ahead of market shifts and advocating for eco-friendly solutions, I help FITOOR-E-KALA create products that don't just look good but **do good** for the planet.

Defence Electronics Research Laboratory (DLRL),

Project Trainee

05/2025 – 07/2025 | Hyderabad, India

- Worked on the project titled "Parsing of Scan Documents Using AI-Based OCR Techniques", focusing on intelligent document processing using Tesseract OCR and deep learning-based approaches.
- Designed the complete system architecture and developed the end-to-end OCR pipeline for scanned documents.
- Implemented integrated workflows combining traditional OCR with AI-based methods for structured data extraction.
- Developed and tested the prototype, ensuring robustness, accuracy, and scalability.
- Led testing, optimization, and deployment of the solution, delivering it successfully to the concerned department at DRDO.
- Successfully completed the internship as part of the academic requirements for the B.Tech  (Computer Science) degree.
